DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 3-5, 10-12, 36, 37, 45, 57-59, 61-63, 65-67, 73 and 75, drawn to a plasma display panel and manufacturing method of a plasma display panel which uses a silver and glass electrode.

Group II, claim(s) 1, 2, 6-9, 13, 22, 29-35, 56, 60, 64, 74 and 79-81, drawn to a plasma display panel and a manufacturing method of a plasma display panel which uses a silver alloy electrode.

Group III, claim(s) 19, 21, 43, 44, 46-55, 77 and 82-90, drawn to a plasma display panel and a manufacturing method of a plasma display panel with +Ag ions.

Group IV, claim(s) 14-18, 23-28, 38-42, 68-71 and 76, drawn to a plasma display panel and a manufacturing method of a plasma display panel having silver particle electrodes.

Group V, claim(s) 20, 72 and 78, drawn to a plasma display panel having first electrode facing surface metal ions of tin, manganese, iron and indium which are in concentrations of 1000ppm or less.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I pertains to a plasma display panel and a manufacturing method of a plasma display panel which uses silver and glass to form electrodes.

Group II pertains to a plasma display panel and a manufacturing method of a plasma display panel, which uses silver alloy electrodes.

Group III pertains to a plasma display panel and a manufacturing method of a plasma display panel with +Ag ions.

Group IV pertains to a plasma display panel and a manufacturing method of a plasma display panel having silver particle electrodes.

Group V pertains to a plasma display panel having a first electrode facing surface with tin, manganese, iron and indium ion concentrations of 1000ppm or less.

A telephone call was made to Joseph Price on 5/13/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
